Labor Shed Analysis

A labor shed analysis is defined as where workers work and where workers live relative to a user-defined selection area. This analysis helps to determine where a labor market draws its commuting workers. Labor shed studies can draw comparisons between various geographies including state, Congressional District, Metropolitan Statistical Area (MSA), county, Workforce Investment Area (WIA), Zip Code, and Census tract. By indicating how many of the selection area workers work outside the area, labor sheds can help identify potential pools of workers who would be available for work in the user-defined area.

Labor shed studies provide economic developers and existing or prospective employers a tool to understand the local labor market and make informed expansion and site selection decisions. In addition, labor shed studies can help indicate potential impacts from environmental, social, or economic incidents.

OnTheMap, Census Bureau

OnTheMap is a mapping and reporting tool developed by the U.S. Census Bureau showing employment and home locations of workers with companion reports for user-defined areas. It is the first synthetic data product released by the Census Bureau. OnTheMap is an important tool for Florida to perform labor inflow/outflow analyses and provide commuting data to planning and economic development agencies as well as Regional Workforce Boards. OnTheMap data is also used by the Department of Economic Opportunity to help quantify natural disaster impacts for emergency management agencies based on where workers live and where they work.

OnTheMap integrates existing data from state-supplied administrative records on workers and employers with existing federal censuses, surveys, and other administrative records. The state Labor Market Information (LMI) agencies supply key data from unemployment wage records and from businesses each quarter. The Census Bureau merges the state-supplied data with current demographic information to produce the data found in OnTheMap. By combining data from different administrative sources, censuses, and surveys, the Census Bureau produces local employment information that was not previously available.

Florida Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research (WSER)

The Florida Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research (WSER), produces, analyzes, and distributes labor statistics to improve economic decision making. These data are produced as part of the federal/state cooperative statistical program with the U.S. Department of Labor, Bureau of Labor Statistics, and the Employment and Training Administration.

Executive Summary

The analysis of workforce and demographic characteristics, including commuting patterns of DeSoto County was conducted to provide economic data on the population and labor force living or working in the county. The report is useful for detailing where workers work and live in order to align resources. This report includes population, labor force, and demographics for DeSoto County.

Workers employed in DeSoto County are clustered in the Transportation and Warehousing (12.6%), and Health Care and Social Assistance (12.4%) industries. Workers living in DeSoto County are concentrated in the Retail Trade (13.2%), and Health Care and Social Assistance (13.1%) industries.

A detailed examination of commuting patterns for DeSoto County shows that the county has a net outflow of -2,368 workers. Using the latest annual Census data available, there were 8,446 workers employed in DeSoto County and 10,814 workers living in DeSoto County. Of the workers who lived in the county, 7,546 workers (69.8%) were employed outside the county.

With 69.8% of workers who reside in DeSoto County employed outside the county, DeSoto County had the 16th highest outflow ranking among Florida counties. Glades County (89.0%) had the highest outflow rate, followed by Union County (86.3%), and Gilchrist County (85.1%). Miami-Dade County (23.4%), Duval County (26.0%), and Escambia County (28.0%) had the lowest worker outflow rates.

Of the 7,546 DeSoto County workers employed outside the county, the top destination counties are Charlotte County (1,217 workers), Lee County (915 workers), and Sarasota County (628 workers). Of the 5,178 DeSoto County workers living outside the county, the top origin counties are Charlotte County (946 workers), Sarasota County (427 workers), and Lee County (411 workers).
